

Safety, Health and Environment for Construction Workers

Course Description

The course provides the core knowledge your workers need to stay safe and embeds the good understanding and techniques needed to keep others safe too. The course is relevant to anyone who works on or around a construction site or has cause to visit the site due to the nature of their work.

Course Information

One Day Course

This is a globally-recognised and respected certificated training for their workers covering:

- > Health and safety issues to be managed in the construction industry to protect employees, contractors, neighbours and others
- > The basics of local law
- > The importance of risk assessments and method statements and the development process
- > Site requirements for the welfare of construction workers on site
- > Hazards and controls associated with construction sites and activities including working at height and confined spaces
- > Site environmental management including management of waste and ecology
